CENTRAL INTELLIGENCE AGENCY REPORT NO. [REDACTED]

## INFORMATION REPORT [REDACTED]

COUNTRY: Czechoslovakia DATE DISTR.: 15 July 1954  
 SUBJECT: Aluminum Production at Kovohuty Hron in Svaty Kriz nad Hronom NO. OF PAGES: 1  
 PLACE ACQUIRED: [REDACTED] NO. OF ENCL.: [REDACTED]  
 25X1 DATE OF INFO: [REDACTED] SUPPLEMENT TO REPORT NO.: 634610

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES. EXCEPT AS PROVIDED IN THE MEANING OF TITLE 18, SECTION 776 AND 794 OF THE U.S. CODE, AS AMENDED, ITS TRANSMISSION OR RELEASING OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OR OTHER USE IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. Production of aluminum in the newly built Kovohuty Hron plant at Svaty Kriz nad Hronom (Q10/C54) was started in Autumn 1953<sup>1</sup> but the full production capacity [REDACTED] of the plant will not be reached before the end of 1955. Construction of an aluminum plant in Czechoslovakia had been planned since 1949. At that time negotiations between Czechoslovakia and Hungary were started within the framework of the Eastern Bloc's mutual economic cooperation with the aim of securing deliveries of Hungarian bauxite for the planned production of aluminum in Czechoslovakia but these negotiations resulted in a standstill, chiefly because of the old-dated political animosity between the two countries. It was only in 1951 that Moscow decided definitely that Hungarian bauxite would be processed in Czechoslovakia and that the construction of the Kovohuty Hron plant was started.<sup>2</sup> The reason for this decision was the Czechoslovak ability to supply electrical energy needed for the plant from the newly built hydroelectric power plants in the Vah valley and the relative proximity of Hungarian bauxite deposits from the plant site.

25X1

2. [REDACTED] the production of the Kovohuty Hron plant would not only be capable of meeting all Czechoslovak aluminum requirements but that the whole Soviet orbit would become independent of Western aluminum supplies after the full-scale production of the plant had been reached.
